

Data Warehouse Description

1. Datetable

This table is specific with all the dates. It is the table we used to link all the other tables.

Column	Type	Description
Date	Date / Hour	Dates from 1st January of 2000 to 31 December of 2023

2. % of the annual renewable energy used

This table shares of renewable energy in gross final energy consumption.

Column	Type	Description
Country	String	Name of the country
Date	Date	Date of the value
Value	String	Value

3. Annual primary consumption by million tonnes of oil equivalent

This table is specific with final consumption energy values. It has an annual frequency.

Column	Type	Description
Country	String	Name of the country
Date	Date	Date of the value
Value	String	Value

4. Demographic sum-up - Population average total

This table is specific with values about the demographic balance and gross rates at the national level.

Column	Type	Description
Country	String	Name of the country
Date	Date	Date of the value
Value	String	Value

5. employability for female in %

This table is specific with all the annual values of female employability.

Column	Type	Description
Country	String	Name of the country
Date	Date	Date of the value
Value	String	Value

6. *employability for male in %*

This table is specific with all the annual values of male employability.

Column	Type	Description
Country	String	Name of the country
Date	Date	Date of the value
Value	String	Value

7. *Energy productivity by Euro per kilogram of oil equivalent*

This table is specific with all the values about energy productivity.

Column	Type	Description
Country	String	Name of the country
Date	Date	Date of the value
Value	String	Value

8. *Final consumption by million tonns of oil equivalent*

This table is specific with all the values about the final consumption of energy.

Column	Type	Description
Country	String	Name of the country
Date	Date	Date of the value
Value	String	Value

9. *GDP at market prices*

This table is specific with all the values about GDP linked with the different market prices.

Column	Type	Description
Country	String	Name of the country
Date	Date	Date of the value
Value	String	Value

10. *General government annual gross debt*

This table is specific with all the values of Governmental annual gross debt.

Column	Type	Description
Country	String	Name of the country
Date	Date	Date of the value
Value	String	Value

11. General government debt

This table is specific with all the values of Governmental debt.

Column	Type	Description
Country	String	Name of the country
Date	Date	Date of the value
Value	String	Value

12. HICP of recreation and culture

This table is specific with all the values about the HICP of recreation and culture.

Column	Type	Description
Country	String	Name of the country
Date	Date	Date of the value
Value	String	Value

13. Household debt in % of GDP

This table is specific with all the values about household debt in percentage of the GDP.

Column	Type	Description
Country	String	Name of the country
Date	Date	Date of the value
Value	String	Value

14. Indicators France

Table with all the values of the different indicators about France.

Column	Type	Description
Country Name	String	Name of the country
Country Code	String	Code of the country (FRA, LVA)
Series Name	String	Name of the specific attributes
Date	Date	Date of the value
Value	String	Value

15. Indicators Latvia

Table with all the values of the different indicators about Latvia.

Column	Type	Description
Country Name	String	Name of the country
Country Code	String	Code of the country (FRA, LVA)
Series Name	String	Name of the specific attributes
Date	Date	Date of the value
Value	String	Value

16. *openaq fr air quality*

This table is specific with all the values about the air quality in France more precisely on different places of the capital.

Column	Type	Description
Country Label	String	Name of the country
Country Code	String	Code of the country (FRA, LVA)
City	String	Name of the different locations
Coordinates	String	Coordinates of the location
Pollutant	String	Name of the pollutant
Unit	String	Unit of the values ($\mu\text{g}/\text{m}^3$)
Last Updated	Date	Date of the last update of the value
Value	String	Value

17. *openaq lv air quality*

This table is specific with all the values about the air quality in Latvia more precisely on different places of the capital.

Column	Type	Description
Country Label	String	Name of the country
Country Code	String	Code of the country (FRA, LVA)
Location	String	Name of the different locations
Coordinates	String	Coordinates of the location
Pollutant	String	Name of the pollutant
Unit	String	Unit of the values ($\mu\text{g}/\text{m}^3$)
Last Updated	Date	Date of the last update of the value
Value	String	Value

18. *Population density by square kilometers*

This table is specific with all the values about the population density by countries by square kilometers.

Column	Type	Description
Country	String	Name of the country
Date	Date	Date of the value
Value	String	Value

19. Private sector credit flow % of GDP

This table is specific with values about private sector credit flow in percentage of the country GDP.

Column	Type	Description
Country	String	Name of the country
Date	Date	Date of the value
Value	String	Value

20. Surfaces of the protected terrestrial areas

This table is specific with all the values about the protected terrestrial areas by country.

Column	Type	Description
Country	String	Name of the country
Date	Date	Date of the value
Value	String	Value

21. Total employability in %

This table is specific with the total percentage of employability by country and sex.

Column	Type	Description
Country	String	Name of the country
Date	Date	Date of the value
Value	String	Value
